Art Unit: 1724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-12 and 26-29, drawn to a system, classified in class 210, subclass 167.

II. Claims 13-25, drawn to a method, classified in class 210, subclass 696.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the system as claimed can be used in a materially different method such as a papermaking method.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to William E. Anderson on 9-16-02 to request an oral election to the above restriction requirement, but did not result in an election being made

Art Unit: 1724

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
